

CareerCompass Website Portfolio

Designed & Developed by Nexapro Technology

Live Project Demonstration: [careercompass](https://careercompass-self-tau.vercel.app)

A modern full-stack career guidance platform built to help students discover ideal educational and career pathways through psychometric assessments, AI-powered planning, and expert counselling.

Project Overview

CareerCompass is a responsive digital platform created for students from Class 9–12, gap-year learners, and educational institutions. The platform simplifies subject selection, stream planning, and long-term career roadmap creation using scientific assessments and personalized AI recommendations. Built with a scalable architecture, this solution combines an engaging React.js frontend with a secure Node.js backend for performance, flexibility, and future expansion.

Technology Stack

- **Frontend:** React.js for responsive UI, dynamic components, and seamless user interaction
- **Backend:** Python with FastAPI for high-performance API development, secure backend architecture, and scalable business logic
- **Database:** MongoDB for flexible, scalable, and efficient data storage for users, assessments, and personalized career plans
- **Design Focus:** Modern UX/UI, mobile responsiveness, and student-friendly navigation
- **Deployment:** Cloud-hosted architecture for accessibility, speed, and performance

Core Functionality & Services

- Career Test with psychometric analysis
- AI Career Plan generation based on student strengths
- Personalized Guidance from expert counsellors
- Ongoing support for long-term educational planning

Programs & User Segments

- Stream & subject selection for school students
- Career re-planning for gap-year students
- Institution-focused customized assessment solutions

About Platform Mission

- Strength-based guidance approach
- Scientific psychometric integration
- AI + Human counsellor collaboration

Business Value & Practical Use

- Helps students reduce confusion in stream and subject selection after school
- Provides data-driven career clarity through scientifically validated methods
- Supports parents and schools with structured educational planning
- Creates monetization opportunities through assessments, demos, counselling, and institutional partnerships
- Strengthens digital transformation in the education counselling industry

Key Highlights by Nexapro Technology

- Enterprise-grade React.js frontend with engaging landing pages and CTA optimization
- Node.js backend ready for scaling user sessions, assessment logic, and admin systems
- Brand-focused interface with modern blue theme and trust-building visual identity
- Optimized for performance, responsiveness, and future feature expansion

Project Conclusion

CareerCompass demonstrates Nexapro Technology's capability to build impactful full-stack digital products that combine business strategy, modern design, and scalable engineering. This project showcases expertise in educational technology, responsive web development, and AI-integrated platform solutions.
