

CivicFix

Smart Public Issue Reporting & Resolution System

A clean, scalable civic-tech platform developed by **Nexapro Technology** to transform how citizens report, track, and resolve municipal issues.

Built with Laravel, PHP, Tailwind CSS, HTML5, JavaScript, and MySQL, CivicFix connects citizens, administrators, and field workers in one transparent ecosystem.

Designed for real-world municipalities, smart cities, and public governance modernization.

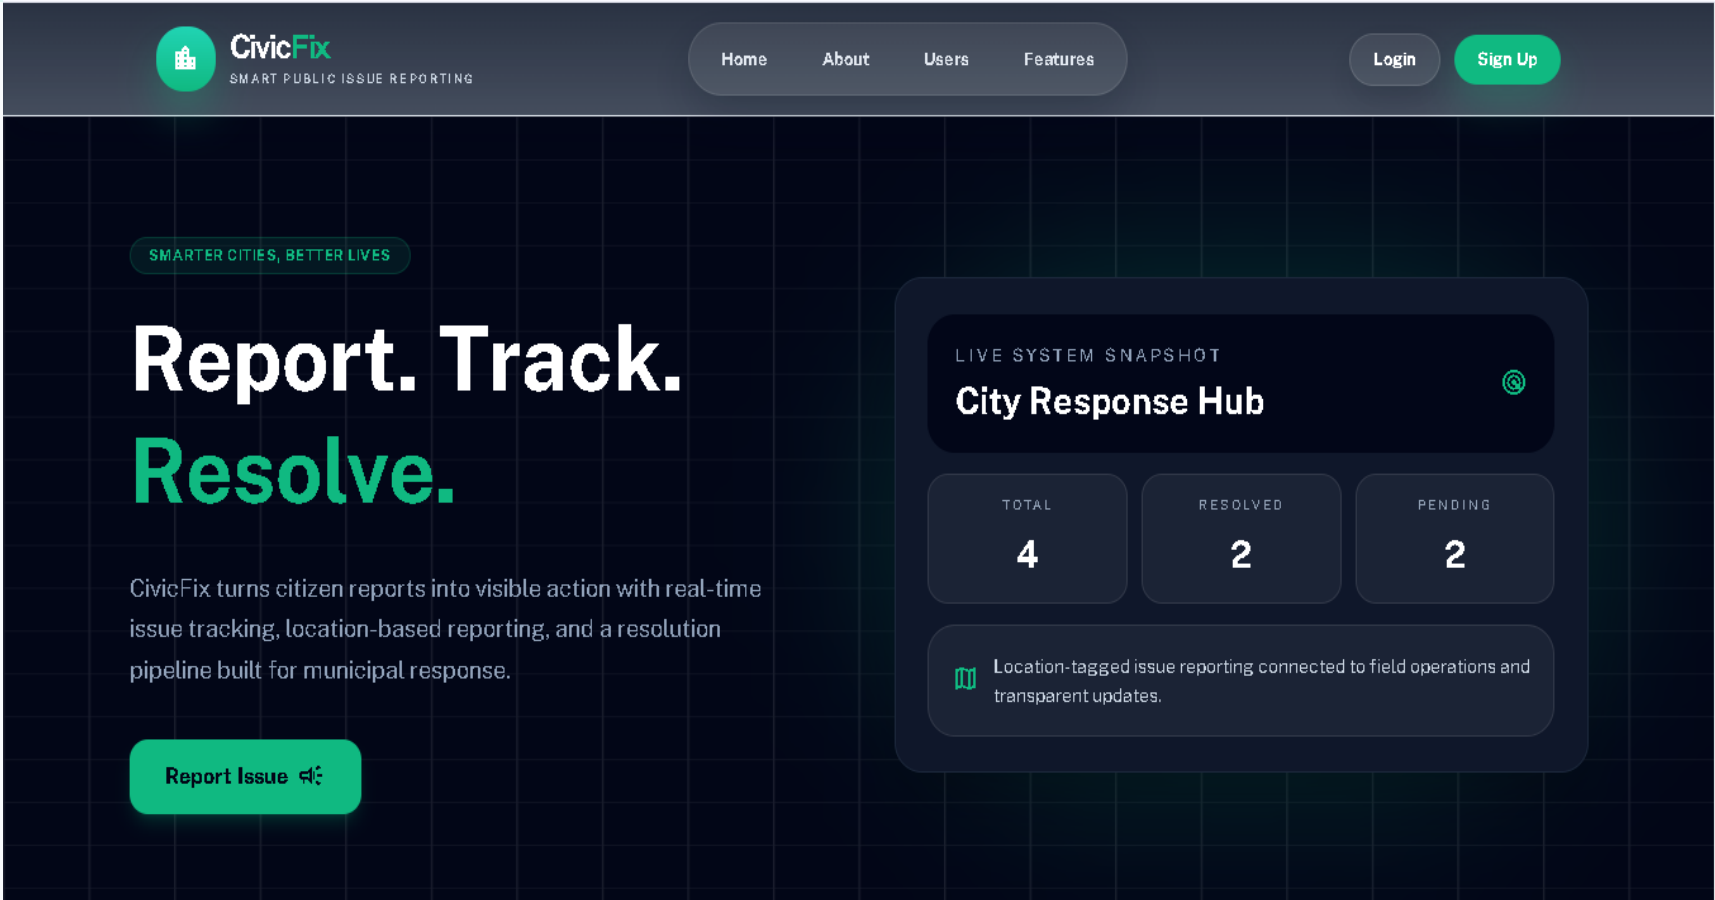

Why CivicFix Matters

CivicFix solves fragmented civic complaint systems by creating a centralized public infrastructure platform where every complaint becomes trackable, assignable, and measurable.

Key Benefits:

- Faster issue reporting for roads, sanitation, water, and electricity
- Transparent complaint lifecycle for citizens
- Department accountability with deadlines
- Workforce productivity dashboards
- Live map-based issue intelligence
- Improved public trust and municipal responsiveness

Landing Experience

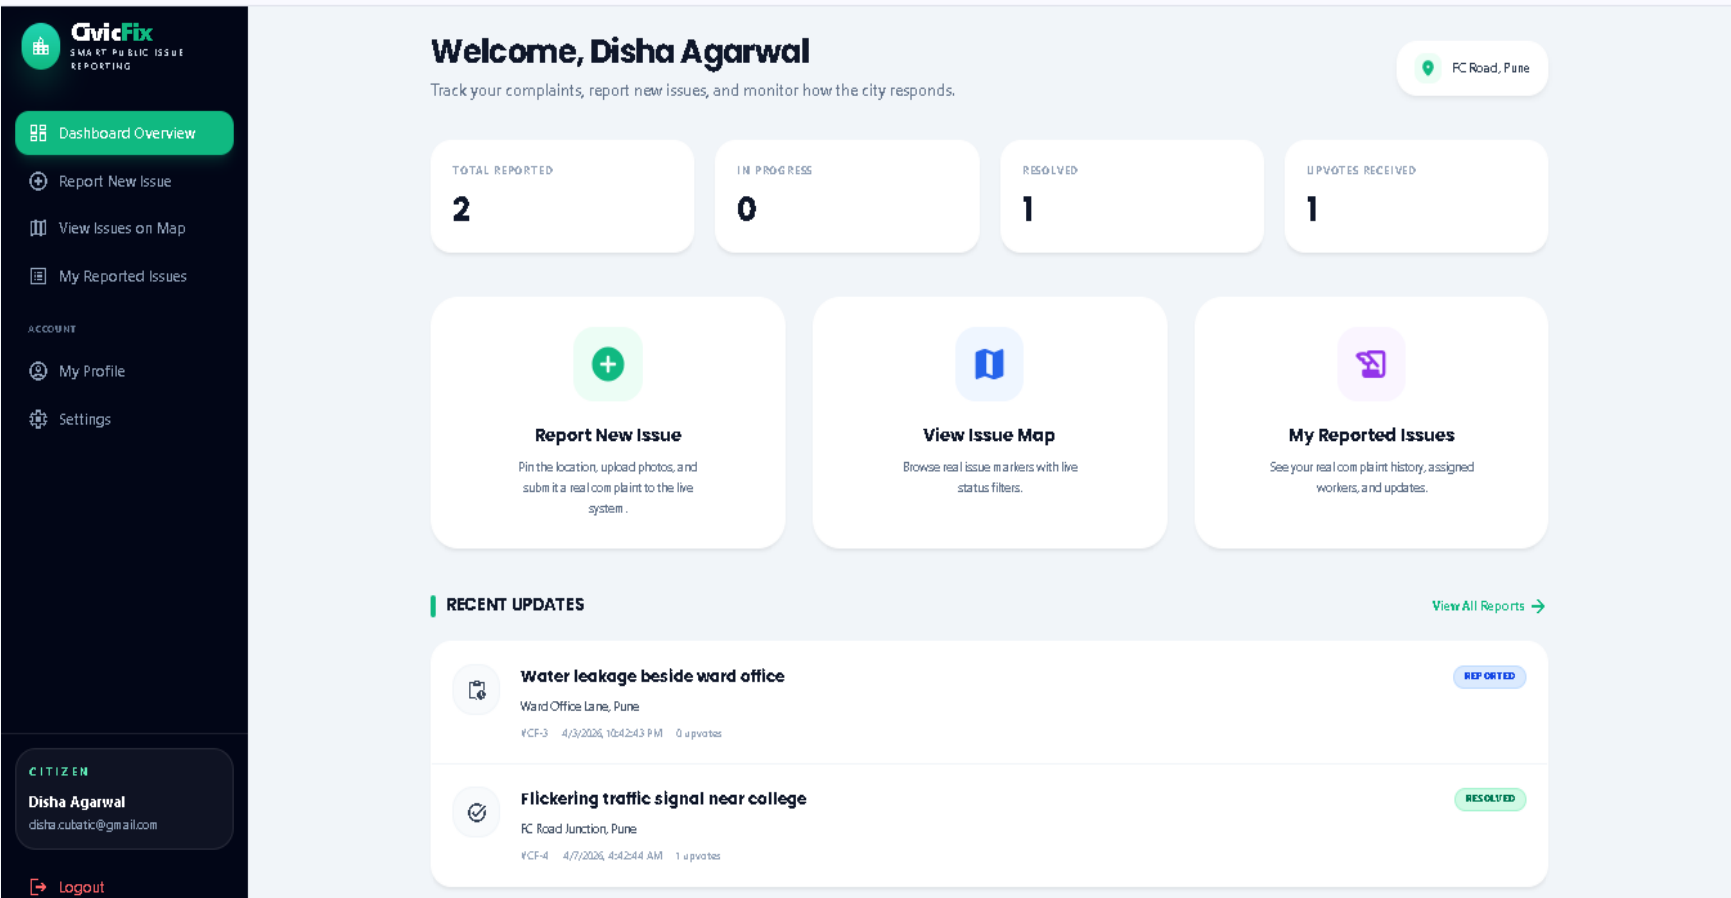

Modern homepage crafted to establish trust, guide users, and showcase smart-city transformation.

Citizen Registration

Secure public onboarding with intuitive UI and identity management.

Citizen Dashboard

Track submitted complaints, progress, and updates from a unified dashboard.

Issue Submission Engine

Report New Issue

Describe the issue, pin its location on the map, and upload images to help the city respond faster.

ISSUE TITLE

e.g. Pothole on Main Street near bus stop

ADDRESS / LANDMARK

Enter an area, landmark, or street name

DESCRIPTION

Share what you observed, when it started, and what impact it is having.

CATEGORY

Roads & Potholes

PRIORITY

Needs attention soon

Pin Exact Location

Click on the map or use your current location.
